

D 5.1

Syllabus material for Sustainable project management course in Bosnia and Herzegovina

Document information

Grant Agreement #:	101177983
Project Title:	Sustainable project management in Balkan HEIs
Project Acronym:	SuProM
Project Start Date:	1 January 2025
Related work packages:	WP5 Deepening project management capacity: Development of project management courses in HEIs in Bosnia and Herzegovina
Related task(s):	T5.1
Lead Organisations:	UNIVERSITY OF TUZLA (UNTZ)
Author(s):	Elvis Ahmetović, Vika Pušnik
Status:	Final-revised-1
Submission date:	13.7.2026
Version:	V.5.0
Type:	R (Report)
Language:	English
Dissemination Level:	SEN

1. Introduction

The objectives of Work Package 5 (WP5): Strengthening sustainable project management capacities through curriculum development and institutional modernization in Bosnia and Herzegovina Higher Education Institutions (HEIs) are:

- to develop sustainable project management modules adapted to the Bosnia and Herzegovina higher education context,
- to introduce sustainable project management courses at Bosnia and Herzegovina HEIs,
- to enhance the knowledge, competencies, and confidence of academic staff and students in sustainable project management practices.

The focus of WP5 is development and implementation of innovative and sustainable project management modules that integrate green, digital, and sustainability-oriented approaches relevant to contemporary project management practices. These modules are intended to support both newly developed training programmes and the modernization of existing curricula, with a strong emphasis on improving students' employability, practical competences, and readiness for the labour market. Special attention is given to aligning academic content with European priorities related to sustainability, digital transformation, and lifelong learning.

WP5 is coordinated by the University of Tuzla, which leads the activities related to curriculum adaptation and the preparation of educational materials for Bosnia and Herzegovina partner institutions participating in the SuProM project. One of the first deliverables within WP5 is D5.1: Syllabus Material for Sustainable Project Management Courses. In this context, the joint syllabus template prepared within the SuProM project aims to support Western Balkan partner institutions, particularly from Bosnia and Herzegovina, in the efficient and harmonized development of course syllabuses related to sustainable project management.

Different syllabus structures and institutional requirements are currently used across Bosnia and Herzegovina universities participating in the project. Consequently, existing syllabus templates and curricular practices from Bosnia and Herzegovina partner institutions were reviewed and analysed in order to identify common elements, institutional specificities, and opportunities for harmonization. The analysis demonstrated that while universities share several core academic components, there are also variations in course structure, learning outcomes, assessment methods, and teaching approaches.

Based on this analysis, a joint syllabus template was developed to provide a practical framework for the preparation and implementation of sustainable project management courses across Bosnia and Herzegovina HEIs involved in the SuProM project. The template aims to ensure consistency, quality, and compatibility with institutional regulations while also addressing the objectives and priorities of the SuProM project. Furthermore, the template promotes the integration of sustainability principles, digital competences, interdisciplinary learning, and student-centred teaching methodologies into higher education curricula in Bosnia and Herzegovina.

In the following chapters, the syllabus materials for the Sustainable Project Management course are presented for the University of Tuzla and the University of Mostar. The main goal in the preparation of the syllabus was to integrate green, digital, and other sustainable aspects relevant to project management in the modern context. The syllabus takes into consideration real challenges and aligns its modules with national labour market demands.
